8. ON-ROAD REGULATIONS

8.1 DEFINITIONS

8.1.1 Day

A Day is from the start in the morning to the finish in the afternoon.

8.1.2 Leg

A Leg is from the start of the day to the lunchbreak; and again from the lunchbreak to the end of the day.

8.1.3 Section

A Section is a selection of the course listed in the road book to ensure that the accumulated distance in a section is not too long. Instructions will be given when the vehicle's distance measuring device is to be reset for the next section. Advisory signs "ZERO ODO"

8.1.4 Allotted Time

An 'Allotted Time' will be listed in the road book (ie: between resetting odometers) and the times listed will be for crew guidance only, as there must be a time limit to when test venues close down. No penalties will be applied for late or early arrival at time controls.

8.1.5 Maximum Lateness

Maximum Lateness is the time at which a time control closes. Details will be advised in the road book.

8.1.6 Ideal Time

Ideal Time is the nominated time for carrying out each Time Test, (PC's) and the time between timing points in a Regularity Test.

8.1.7 Actual Time

Actual Time is the time taken at each Time Test PC and the variation (faster or slower) between the actual time and the ideal time is penalised at the rate of one point per 1/100th of a second. It is also the time taken between timing points in a Regularity Test, with the variation penalised at the rate of one point per 1/10th of a second.

8.1.8 Time Control (TC)

Time Controls are where the times of departure and arrival of a vehicle is recorded on a time card carried by the crew. The location of Time Controls will be advised in the road book but principally these will be at

the start and finish legs to lunch breaks and at the end of the day.

8.1.9 Time Trial (PC - *designated from prove cronometrate*)

Time Trials are a series of PC's where drivers are required to keep to times between a series of timing markers set out over 20 to 200 metres. Various consecutive timing markers (eg: 3 to 5 in each Time Trial) are interconnected with the time for passing over each of the pneumatic pressure tubes connected to a printing chronometer. The exact time a front tyre of a vehicle passes over each tube is measured in 1/100th of a second. This will be fully explained in the Guide to the Event supplied approximately 2 weeks prior to the event.

8.1.10 Regularity Test (*PM - designated 'PM' from Prove di Media*)

A Regularity Test is where drivers are required to keep to a maintained average speed over a given distance. The speed is checked at secret locations located along the route and is converted to Actual Time which is compared to the Ideal Time. Variation between the two times, faster or slower, is penalised at the rate of one point per 1/10th of a second.

8.1.11 Coefficients Assigned to Competition Cars

In order to compensate and equate technical and performance characteristics of the competition cars in the competition, correction coefficients will be assigned based on the design and period of construction of the vehicle.

The maximum coefficient assigned to a car will be 2.0

At the end of each day the penalty points will be tabled. Each car will be then derived a final tally by dividing the penalty points by the car's coefficient number.

i.e. Car 15 has a coefficient number of 1.5 and their daily tally is 300, this is divided by 1.5 to give 200 penalty points for the day.

Car 75 has a coefficient number of 1.0 and their daily tally is 300, this is divided by 1.0 to give 300 penalty points for the day.

The coefficient assigned to each competition car will be published on March 4th, 2022; each competitor will be assigned a coefficient, based on the age and perceived performance of the car.

All competition cars in Category B: Modern, manufactured from January 1977 onwards, will be assigned a coefficient of 1.00.

The organizers will assign the coefficient to each vehicle, their decision will be final. If a replacement competing car is used, the entrant will obtain a new coefficient for that car.

8.2 OFFICIAL TIME SYNCHRONISATION

Official time for the event shall be Australia Eastern Daylight Time (UTC-GMT Melbourne = GMT +11).

8.3 START OF EVENT

The event will start from the Point Leo's Estate, Merrick, at approximately 1400 hours (first vehicle leaving) on Monday 4 April. The remaining vehicles will start at one minute intervals. Details of the start will be advised in a Bulletin.

8.4 FINISH OF EVENT

The event will finish at the AGP Circuit, Lakeside Drive, Albert Park, at approximately 1500 hours on Thursday 7 April. The 1st, 2nd and 3rd outright Awards Presentation will be conducted on the podium on the main straight at the AGP Circuit. Details of the finish and the presentation will be advised in a Bulletin.

8.5 ROAD BOOK

8.5.1 A road book, containing route instructions and maps of the selected course, will be issued to crews at pre-event documentation on Monday 4 April. The instructions to follow the course will be in a format that is easily followed by first time competitors. Distance instructions will be given in kilometers reading to 1/100th (eg: 25.73). Other maps may be carried and used but the Organisers consider these will not be of any advantage. Further details on the road book will be included in the Guide to the Event. The road book will identify some service stations and toilets along the course.

8.5.2 The route instructions will be set out in a series of 'Sections' to ensure that the accumulated distance in a section is not too long. Precise instructions will be given where the vehicle's distance measuring device is to be reset for the next section. i.e. ZERO ODO

8.5.3 Further instructions may be issued in writing at a day's start or orally at any point during the event (eg: to cater for changes in the road book or road conditions, etc).

8.6 RE-ROUTING OF THE COURSE
